

## of Analysis

| Product:                                 | Ammonium Phosphate Monobasic Analytical Standard for Kjeldahl<br>Nitrogen Determination           |                                    |
|--|---|------------------------------------|
| Order code:                              | 045527  |                                    |
| Lot number:                              | 04552719A1  |                                    |
| Expiry date:                             | 28/01/2022  |                                    |
| <u>Test</u>                              | <b>Specification</b>  | <u>Result</u>                      |
| Titration<br>Total Nitrogen (Kjeldahl)   | 12.18% ±0.10<br>(Traceable to NIST SRM 194)   | 12.17%                             |
| Appearance (Colour)<br>Appearance (Form) | Colourless or White<br>Powder or crystals or powder<br>With chunk(s) or crystals with<br>Chunk(s) | White<br>crystals<br>with chunk(s) |
| Titration (T) NaOH 1M                    | 99.5 – 100.5%   | 100.1%                             |
| Loss on Drying                           | ≤0.2%   | <0.05%                             |
| Solubility (Method)                      | 0.1M in $H_2O$  | 0.1M in $H_2O$                     |
| Solubility (Colour)                      | Colourless  | Colourless                         |
| Solubility (Turbidity)                   | Clear   | Clear                              |
| pH Test                                  | 3.8 – 4.4   | 4.2                                |
| Storage:                                 | Room temperature, keep dry and tightly closed   |                                    |
| QC Release Date:                         | 21/01/2019  |                                    |
| Name, Title:                             | Stephen Hayes, QC Technician  |                                    |
| S Hog                                    |   |                                    |
